SUMMARY

Full Stack Software Engineer with a parallel 7-year tech & creative design industry journey, managing a **1.7M subs YT channel**, **former founder of a tech news website**, and an avid **freelancer** with **works featured in Forbes, Uber, and more**.

TECHNICAL SKILLS

Languages: C, Java, Python, JavaScript, TypeScript, SQL (Postgres/MySQL), Mongo, HTML/CSS, SASS

Frameworks: React, Node.js, Flask, Vue.js, Next.js, Nuxt, Express.js, Prisma, Bootstrap, Tailwind

Tools: Git, Docker, REST APIs, CI/CD, AWS, GCP, Kubernetes, Prometheus, Adobe Suite, Figma, Unit Testing (Jest/Vitest/Pytest)

EXPERIENCE

Software Developer

April 2024 – Present

McGill University

Montreal, QC – Full-time

- Full-stack / infra engineer at McGill University, building and maintaining **high-uptime web platforms**, **data processing systems**, and **compute cluster infrastructure** used for large-scale astrophysical research.
- Improved reliability and performance of core **Python / Sanic APIs** and **MongoDB** by tracking down failure modes on multi-CPU nodes, hardening Docker Swarm configs, and load-testing with **Locust**, resulting in far fewer failed calls.
- Operate and scale **10+ node Docker Swarm clusters** (petabyte-scale data flow): containerized legacy services, set up secure deployments with **Docker secrets**, **Prometheus/Grafana** monitoring, automated backups/cron jobs, and recovery workflows for missing data and hardware issues (**ZFS**, disks, **LDAP** auth).
- Led frontend work** on new features in **React** while maintaining and gradually deprecating **Vue 2**, **Django**, and other legacy apps; migrated critical functionality into the newer platform and documented it for non-technical stakeholders.

Full Stack / AI Systems Engineer

May 2024 – Present

Independent Consultant / Upwork (Global clients in fintech, compliance, and analytics)

- Shipped **AI-enabled web apps** and tools using **Next.js**, **Node.js**, **Python**, and **TypeScript**, from prototype to **production**.
- Led end-to-end handover** of a production **microfinance / lending platform**: audited codebase/credentials, enforced **RBAC**, rebuilt deployment pipelines (**AWS**, **Jenkins**), and delivered a **full handover package + architecture docs**.
- Delivered features** like an all-in-one **AI platform**, chat-style **bot integrations**, and **AI PDF/OCR parsing** workflows & built **LLM-driven features** (**RAG pipelines**, **embeddings**, custom prompting).
- Built backend **APIs**, **admin dashboards**, and basic **observability** (**auth**, **RBAC**, **environment isolation**, **logging/monitoring**) so non-technical teams could operate the system without engineering support.
- Advised founders on **feasibility**, **scope**, **cost**, and timeline for idea-stage products; produced **technical audits**, **phased roadmaps**, ERDs, and system diagrams so they could ship a **credible demo** for investors without **burning budget**.

Creative Design Manager

March 2019 – Present

YouTube (@xeetechcare)

- Directing a thriving **1.7 million subscribers** YouTube channel to produce **tech** content for a worldwide audience.
- Managing **partnerships** with top-tier brands including **Samsung**, **Google**, **Chevrolet**, and **more** across diverse sectors.
- Generating over **3+ million monthly views** by producing **2,000+** videos to-date on emerging tech, spanning **smartphones**, **computers**, **electric vehicles**, and more.
- Engineered a **VueJS channel website** and an interactive Discord **Python chatbot** to boost community engagement.
- Enhanced views from **high CPM** regions by **40%** through **SEO** strategies, significantly boosting monetization potential.

EDUCATION

University of Windsor

Windsor, ON

Bachelors in Computer Science, Minor in Communications, Media & Film | GPA: 3.9/4.0 | President's List

2024

PERSONAL PROJECTS (MORE ON **AFROKK.DEV**)

xeetechcare.com | *Vue.js, Nuxt, SSR, Three.js, TypeScript, TailwindCSS, GSAP* | [GitHub](https://github.com)

January 2024

- Pioneered xeetechcare.com, a bespoke **server-side rendered** website using **Nuxt 3** (**Vue.js**).
- Boosted user time-on-site by **40%** through **real-time** timeline updates, integrating **APIs** from **YouTube**, **Twitter**, **Instagram**, and **TikTok**.
- Optimized data fetching pipelines with **serverless functions** and enhanced **UX** using **Three.js** and **GSAP** animations.
