Summary

Full Stack Software Engineer with a parallel 7-year tech & creative design industry journey, managing a **1.7M subs YT channel**, **former founder of a tech news website**, and an avid **freelancer** with **works featured** in **Forbes**, **Uber**, and **more**.

Technical Skills

Languages: C, Java, Python, JavaScript, TypeScript, SQL (Postgres/MySQL), Mongo, HTML/CSS, SASS
Frameworks: React, Node.js, Flask, Vue.js, Next.js, Nuxt, Express.js, Prisma, Bootstrap, Tailwind
Tools: Git, Docker, GraphQL/REST APIs, CI/CD, AWS, GCP, Kubernetes, Prometheus, Adobe Suite, Figma, Unit Testing

Experience

Software Developer — April 2024 – Present

McGill University — *Montreal, QC – Full-time*

- Full-stack / infrastructure engineer at McGill University, building and maintaining **high-uptime web platforms**, **data processing systems**, and **compute cluster infrastructure** used for large-scale astrophysical research.
- Improved reliability and performance of core **Python / Sanic APIs** and **MongoDB** by tracking down failure modes on multi-CPU nodes, hardening Docker Swarm configs, and load-testing with **Locust**, resulting in far fewer failed calls.
- Operate and scale **10+ node Docker Swarm clusters** (petabyte-scale data flow): containerized legacy services, set up secure deployments with **Docker secrets**, **Prometheus/Grafana** monitoring, automated backups/cron jobs, and recovery workflows for missing data and hardware issues (**ZFS**, disks, **LDAP** auth).
- **Led frontend work** on new features in **React** while maintaining and gradually deprecating **Vue 2**, **Django**, and other legacy architecture; migrated critical functionality into the newer platform and documented it for non-technical stakeholders.

Founder & Lead AI Systems Engineer — May 2024 – Present

afrokk.studio – Boutique software studio for global fintech, compliance & analytics clients

- Grew a **Top-Rated Upwork** studio shipping **AI-enabled web apps** from prototype to **production** with **Next.js**, **Node.js**, **Python**, and **TypeScript**.
- Delivered an all-in-one **AI platform** and **LLM features**: **RAG pipelines**, embeddings, custom prompting, chatbot integrations, and **AI PDF/OCR parsing**.
- **Led end-to-end handover** of a production **microfinance lending platform**: audited code and credentials, enforced **RBAC**, rebuilt **AWS/Jenkins** pipelines, and delivered full architecture docs.
- Extended a fintech lender's production **GraphQL API**, adding queries/mutations and hardening auth and performance.
- Built **REST/GraphQL APIs**, **admin dashboards**, and observability (logging, monitoring, env isolation) so non-technical teams could operate systems independently.

Creative Design Manager — March 2019 – Present

YouTube (@xeetechcare)

- Directing a thriving **1.7 million subscribers** YouTube channel to produce **tech** content for a worldwide audience.
- Managing **partnerships** with top-tier brands including **Samsung**, **Google**, **Chevrolet**, and **more** across diverse sectors.
- Generating over **3+ million monthly views** by producing **2,000+** videos to-date on emerging tech, spanning **smartphones**, **computers**, **electric vehicles**, and more.
- Engineered a **VueJS channel website** and an interactive Discord **Python chatbot** to boost community engagement.
- Enhanced views from **high CPM** regions by **40%** through **SEO** strategies, significantly boosting monetization potential.

Education

University of Windsor — Windsor, ON

Bachelors in Computer Science**, Minor in Communications, Media & Film* | ***GPA: 3.9/4.0 | ***President's List*** — *2024*

Projects (more on afrokk.dev)

Echo Therapy | *Next.js, TypeScript, PostgreSQL, Redis, BullMQ, S3/MinIO, AWS, OpenAI*

- Architected and built **Echo**, a full-stack, HIPAA-compliant therapy practice platform integrating patient records, scheduling, session workflows, and AI-driven transcription, privacy masking, structured note generation, and clinician approval.
- Engineered a **fault-tolerant, compliance-focused pipeline** with presigned S3 uploads, Redis/BullMQ workers, database RLS policies, auditable PostgreSQL state transitions, PHI-minimized logs, and automatic audio deletion.
